DISTRICT CENSUS HANDBOOK
1951

KHERI DISTRICT

FOREWORD

Several States, including Uttar Pradesh, have been publishing village statistics by districts at each census. In 1941 they were published in U. P. under the title "District Census Statistics" with a separate volume for each district. In the 1951 census, when the tabulation has been more elaborate than ever in view of the requirements of the country, the district-wise volume has been expanded into a "District Census Handbook", which now contains the District Census Tables (furnishing data with break-up for census tracts within the district), the District Index of Non-agricultural Occupations, agricultural statistics from 1901-02 to 1950-51 and other miscellaneous statistics in addition to the usual village population statistics. The village population statistics also are given in an elaborate form giving the division of the population among eight livelihood classes and other details.

2. It may be added here that a separate set of district-wise volumes giving only population figures of rural areas by villages and of urban areas by wards and mohallas and entitled "District Population Statistics" has already been published. This separate series was necessitated by the urgent requirements of the U. P. Government for elections to local bodies.

3. The number of District Census Handbooks printed so far is forty-two. Special arrangements for speeding up the printing have now been made and it is hoped that the remaining Handbooks will be printed before the end of 1955.

RAJESHWARI PRASAD, I.A.S.,

Superintendent, Census Operations,

Uttar Pradesh

INTRODUCTION

A—THE DISTRICT

1. The district of Kheri is bounded on the east by the district of Bahraich, from which it is separated by the Kauriala river ; on the south by the districts of Sitapur and Hardoi ; on the west by the districts of Shahjahanpur and Pilibhit ; and on the north by the territory of Nepal. It is one of the large districts of the State having an area of 2,972 square miles. Its population in 1951 was 10·58 lakhs. It consists of three tehsils—Nighasan in the north and east, Lakhimpur in the centre and Muhamdi in the south-west. There are 17 parganas and 13 thanas in the district.

2. In its general aspect the district is a vast alluvial plain, covered in the northern half with wide stretches of forest, and scored with the channels of numberless rivers and watercourses. There are no prominent eminences, and the only irregularities of surface are formed by the low river beds and the high banks which flank them on either side. The result is a series of fairly elevated plateaux, separated by rivers flowing from the north-west, and each bordered by low alluvial belts of varying width. The general slope of the country is from north-west to south-east. Topography

It may be divided into four main tracts, separated by rivers. In the south-west is the trans-Gomti tract which adjoins Shahjahanpur. The western portion lies low and is covered in places by grassy wastes and *dhak* jungle, while much of it is liable to saturation. In the centre is a belt of fertile loam, but to the east there is a fringe of inferior sandy land along the Gomti. The second tract lying between the Gomti and Kathna, and commonly known as the *Parehar*, is for the most part high and sandy ; but there is a considerable depression in the centre of tehsil Muhamdi. Generally the sub-soil is in most places too light to admit of the construction of unprotected wells. East of the Kathna is the central tract. It is the richest part of the district with good loam soil ; but on the borders of the rivers the land is often sandy and inferior. In the north-west of Muhamdi and south-east of Lakhimpur there are some depressions having clay soil. The last tract consists of the riverain parganas beyond the Ul. It is a wild country, cut up with innumerable channels, flooded during the rains and fever-stricken. The north is all forest. The cultivation is usually shifting and unstable. The water is everywhere close to the surface, and is almost uniformly bad.

A very large area of the district is covered by water. Rivers and streams are exceptionally numerous. They have been frequently changing their course leaving behind old channels in which the water collects to form lakes and swamps. The area under water is greatest in the Nighasan tehsil.

3. The soils in this district are sandy *bhur* in the more elevated portions and along the high banks of the rivers, loam or *dumat* in the level uplands and *matiar* or clay in the depressions. A peculiar soils is that known as *tapar*, which is found beyond the Chauka. It is of a light gritty description and of very poor productive power. It is locally classed as *bhur*, but is altogether different from the soil generally known by that name. Soils

4. The figures of classification of area during the last fifty years are given in Table 2 of Part III of this volume. The proportion of area under the various categories works out as follows for 1950-51 : Classification of area

Particulars	Actual figures (in acres)	Percentage
Cultivated area	912,800	48·1
Culturable waste (excluding current fallow)	413,477	21·8
Current fallow	100,278	5·3
Forest	294,883	15·5
Area not available for cultivation of which—	175,764	9·3
(a) Covered with water	92,964	4·9
(b) Under sites, roads and buildings	60,496	3·2
(c) Barren	22,304	1·2

The figure in the above table regarding culturable waste taken from the Season and Crop Report is, however, misleading. The State Agriculture Department conducted in 1949-50

a detailed enquiry through the District Officers regarding the nature of this area in each district. The following analysis of the area resulted from this enquiry :

Particulars	Area (in acres)	Percentage
Total Culturable waste (A+B+C)	411,809	100
A—Area under culturable waste land not available for immediate cultivation ..	252,043	61.20
(i) Forest under any legal enactment
(ii) Groves	37,257	9.05
(iii) Forests of timber trees.. .. .	33,107	8.04
(iv) Thatching grasses, shrubs and bushes	163,946	39.81
(v) Land kept for grazing	17,733	4.30
B—Area under culturable waste land available for immediate cultivation but which could not be cultivated	120,430	29.25
Of which due to—		
(i) Kians growth	8,138	1.98
(ii) Threshing floors	851	0.21
(iii) Malaria	2,746	0.67
(iv) Floods	11,436	2.78
(v) Lack of drains	1,169	0.28
(vi) Lack of water	241	0.06
(vii) Distance from <i>añadi</i>	8,962	2.18
(viii) Damage from wild animals	40,134	9.74
(ix) Other causes	46,753	11.35
C—Area under culturable waste land that can be brought under immediate cultivation after some improvements besides the area given against 'B.' ..	39,336	9.55

From the above it will appear that of the total area recorded as culturable waste only 9.55 per cent. was really capable of being brought under immediate cultivation after some improvements.

Thus the land area cultivated and cultivable including current fallow *per capita* works out to 134.8 cents of which 95.7* cents have already been brought under cultivation and only about 3.7 cents can be further brought under the plough after some improvements.

Climate and rainfall

5. The climate to the south of the Ul river resembles that of the adjoining districts of Sitapur and Shahjahanpur ; while to the north, where the land is traversed by numerous rivers and covered by wide stretches of forests, it is one of the most unhealthy in the State. Deadly fevers are endemic and the water is bad.

The average rainfall for the last quinquennium was 43.98 inches. During the last 45 years it has been less than 17 inches in only one year and has usually been over 36 inches. The comparatively heavy rainfall is due to the proximity of the hills and to the cold winds that blow from the north, and also to the vast areas under forest and jungle.

Irrigation

6. Irrigation is derived from wells, canals and other natural reservoirs. Of the total irrigated area in 1950-51 wells (including tube wells) covered 17.6 per cent., canals 61.2 per cent. and other sources 21.2 per cent.

Crops

7. More acreage is sown, under the *kharif* than under the *rabi* crops. In 1950-51 the area under *kharif* was 672,953 acres, that under *rabi* 466,228 acres and that under *zaid* crops 1,521 acres. The principal *kharif* crop of the district is rice and the principal *rabi* crop is wheat followed by gram.

*The figure also includes the area classed as current fallow.

B—ANALYSIS OF THE STATISTICS

1. The table below shows the two basic figures—land area and population—and the derived figures of land area *per capita*:

Population :
General
distribution
and density

Tehsil	Population (in lakhs)	Density (number per square mile)	Land area (in lakhs of acres)	Land area <i>per capita</i>
Lakhimpur	4.38	416	6.74	1.54
Muhamdi	3.04	459	4.24	1.39
Nighasan	3.16	253	8.01	2.53
Kheri district	10.58	357*	18.99	1.79

This district though sixth in order of area is thirty-third in the State in respect of population. The district density (357) is below the State average (557). The rural density is 332, the density of the rural parts of the tehsils being : Lakhimpur 381, Muhamdi 434 and Nighasan 237. It is one of the lowest in the State, owing to the large forest areas (especially in tehsil Nighasan). (*Vide* Tables A-I and E)

2. The population of the district during the last fifty years has recorded an increase of 16.9 per cent. Compared to this the increase in the population of the State during the corresponding period has been 30 per cent. The table below exhibits the variation in the total, rural and urban population for the last five decades :

Growth of
population

Census year	Population			Variation		
	Total	Rural	Urban	Total	Rural	Urban
1901 ..	905,138	871,560	33,578			
1911 ..	959,208	930,444	28,764	+54,070 (+6.0)	+58,884 (+6.8)	-4,814 (-14.3)
1921 ..	913,475	884,447	29,028	-45,733 (-4.8)	-45,997 (-4.9)	+264 (+0.9)
1931 ..	944,479	898,865	45,614	+31,004 (+3.4)	+14,418 (+1.6)	+16,586 (+57.1)
1941 ..	1,024,025	969,088	54,937	79,546 (+8.4)	+70,223 (+7.8)	+9,323 (+20.4)
1951 ..	1,058,343	981,081	77,262	+34,318 (+3.4)	+11,993 (+1.2)	+22,325 (+40.6)

Between 1901 and 1921 the population of the district recorded an increase of 0.9 per cent. when that of the State decreased by 4.0 per cent. Due to the heavy mortality from influenza epidemic in 1918-19, a decrease of 4.8 per cent. was recorded during the decade 1911-21 but the decade 1901-11 had fared well and there was an increase in population of about 6.0 per cent. The population of the district recorded an increase of only 15.9 per cent. since 1921 against an increase of 35.5 per cent. in the population of the State during the same period. It is one of the unhealthy districts of the State and there has always been a large exodus of labour to the larger towns outside the district. The population of the district increased by 3.4 per cent. in the last decade, which is much below the State average (11.8 per cent.). During this period Nighasan tehsil recorded the lowest increase (0.8 per cent.) in the district, the percentage increases in other tehsils being : Lakhimpur 3.4 and Muhamdi 6.1.

3. Births and deaths and migration account for the trends in the population growth. The following table gives the mean decennial registered birth and death rates and the natural rate of

Vital statistics

*According to the area given by the Surveyor General, the density is 356.

increase and population growth rates of the last three decades for the district as a whole and for its rural and urban areas :

			Total	Rural	Urban
<i>Mean decennial birth-rate</i>					
1941—50	23·1	22·6	29·7
1931—40	35·8	36·2	27·3
1921—30	34·7	35·8	6·5
<i>Mean decennial death-rate</i>					
1941—50	17·1	17·4	12·4
1931—40	25·3	25·9	13·3
1921—30	25·9	26·7	7·0
<i>Mean decennial rate of natural increase</i>					
1941—50	6·0	5·2	17·3
1931—40	10·5	10·3	14·0
1921—30	8·8	9·1	—0·5
<i>Mean decennial growth-rate</i>					
1941—50	3·3	1·2	33·8
1931—40	8·1	7·5	18·5
1921—30	3·3	1·6	44·4

There are large omissions in the registration of births and deaths and so the above rates do not represent the true picture at all. They may, however, be taken to be roughly indicative of trends. Both birth and death-rates have fallen during the last decade, but the survival rate has also declined.

The figures of natural increase and growth-rates suggest that the district suffered a loss in population on account of migration during all the three last decades.

The average yearly mortality from various causes in the district during 1941—50 was as follows :

Causes								Number of deaths	Percentage of total deaths
Fever	15,197	85·5
Dysentery or diarrhoea	56	0·3
Respiratory diseases	54	0·3
Plague, cholera and small-pox	1,360	7·7
Others	1,103	6·2

As in the rest of the State 'fever' is responsible for a majority of the deaths. But 'fever' covers a number of ailments which the reporters are unable to identify. (*Vide* Table I Part III of this volume)

Migration

4. About 91·8 per cent. of the people enumerated in the district at the census of 1951 were born there, 6·9 per cent. were born in other districts of the State, 0·5 per cent. were born in other parts of India and 0·8 per cent. were born in other countries. Of the immigrants from the districts of the State as many as 23,266 persons (males 8,178, females 15,088) were from other districts of the same natural division and 49,643 persons (males 19,533, females 30,110) were from other parts of the State. The sex proportion suggests that most of the migration is from the neighbouring districts and is marriage migration. Of the immigrants from adjacent States, 3,151 persons (males 2,540, females 611) were from Punjab and 826 persons (males 681, females 145) were from Rajasthan.

Of the immigrants who have come from territories beyond India, 2,517 persons (males 1,439, females 1,078) were Pakistan-born and 6,217 persons (males 3,921, females 2,296) had their birth-place in other territories. The Pakistan-born are mostly the displaced persons who numbered 2,315 (males 1,302, females 1,013) in the district. Of the immigrants born in other territories 6,173 persons were Nepal-born

The number of non-Indian nationals in the district was 933. Of them 928 were Nepalese and 5 were Americans.

Unfortunately the figures of emigration are not available. On the balance of migration according to vital statistics, however, the district appears to have lost about 50,000 persons during 1921—30, 24,000 persons during 1931—40 and 28,000 persons during 1941—50. But it should be kept in mind that the figures contain an element of registration error and are only indicative of trends.

5. We may now analyse the growth of population in the district during the last thirty

Census year	Population	Net area sown (in acres)	Area of cultivation <i>per capita</i> (in cents)
1921 ..	913,475	869,761	95.2
1931 ..	944,479	785,450	83.1
1941 ..	1,024,025	836,736	81.8
1951 ..	1,058,343	873,720	82.6

years in relation to the growth of cultivation during the same period. The marginal table shows the figures: (Figures of area shown under census years are quinquennial averages for five years ending with the crop year immediately preceding the census year) It is obvious that cultivation has failed to keep pace with the population. The cultivated area *per capita* has gone down to 82.6 cents in 1951 from 95.2 cents in 1921. The magnitude of this drop is about one-eighth of 1921 level. It means that (other things being equal) every man, woman and child must expect to get less food and other agricultural produce from the land in 1951 than what he was deriving in 1921.

Decline of cultivation *per capita*

6. It may be examined whether this shortage has been compensated by an increase in the yield per acre. Increase in yield can be brought about by more double cropping, more irrigation, better fertilization and better culture. The average (quinquennial) area sown more than once was 209,506 acres in 1921, 200,295 acres in 1931, 209,652 acres in 1941 and 207,102 acres in 1951. The figures of double cropped cultivation *per capita* are as follows:

Double cropped area *per capita*

Particulars	Quinquennial averages for the year preceding			
	1951	1941	1931	1921
Double crop cultivation <i>per capita</i> in cents	19.6	20.5	21.2	23.0
Unirrigated double crop cultivation <i>per capita</i> in cents ..	19.5	20.2	21.1	22.8
Irrigated double crop cultivation <i>per capita</i> in cents ..	0.1	0.3	0.1	0.2

It may be noted that the double crop cultivation *per capita* has been steadily declining since 1921.

7. The average area irrigated in the district was 106,063 acres in 1921, 74,878 acres in 1931, 76,462 acres in 1941 and 52,073 acres in 1951. The average area irrigated more than once was 1,655 acres in 1921, 978 acres in 1931, 3,136 acres in 1941 and 1,027 acres in 1951. The figures of irrigation *per capita* are shown below:

Irrigated area *per capita*

Particulars	Years			
	1951	1941	1931	1921
Irrigated single crop cultivation <i>per capita</i> in cents ..	4.8	7.2	7.8	11.4
Irrigated double crop cultivation <i>per capita</i> in cents ..	0.1	0.3	0.1	0.2

The irrigated area *per capita* has also declined since 1921.

8. During the quinquennium 1916—21, 92.6 per cent. of the cropped area was under food crops and 7.4 per cent. was under non-food crops. Thirty years after during 1946—51 the cropped

Cropped area

area under food crops was only 85.7 per cent. and that under non-food crops was 14.3 per cent. The proportionate area under different crops between 1911 and 1951 was as below :

			Percentage of cropped area under							
Quinquennial average of		Total cropped area								
			Rice	Wheat	Barley	Juar	Bajra	Maize	Gram	Others
1911—16	..	1,065,549	14.4	18.0	11.7	1.4	4.7	9.6	10.4	29.8
1916—21	..	1,050,798	21.5	16.0	11.4	1.4	3.4	8.0	10.3	28.0
1921—26	..	1,037,650	20.9	16.1	10.4	1.2	2.1	7.0	15.4	26.9
1926—31	..	986,904	21.4	17.0	9.4	1.1	1.4	10.5	11.3	27.9
1931—36	..	1,001,519	19.4	19.9	6.5	1.0	1.8	10.3	11.5	29.6
1936—41	..	1,052,375	22.7	19.2	6.1	0.7	1.8	6.8	13.1	29.6
1941—46	..	1,041,925	17.2	19.2	7.1	1.3	2.7	11.3	11.7	29.5
1946—51	..	1,092,193	20.3	18.3	7.7	1.2	2.0	9.0	12.0	29.5

Opium which was cultivated in 2,501 acres in 1901-02, has completely gone out of cultivation since 1924-25. Indigo has also gone out of cultivation. Cotton has never been an important crop of the district during the last fifty years. The area under sugarcane was 41,138 acres in 1901-02 ; in 1950-51 it was 105,845 acres.

Live stock, ploughs and carts

9. Live-stock in this country live for a large part of the year on by-products of agriculture supplemented by green-fodder crops. They have, therefore, to be correlated not only with the grazing available but also with the total area under cultivation which carries a major portion of the burden of supporting the cattle population.

As will appear from Table 3 of Part III the total number of cattle and buffaloes has decreased since 1935 when the figure stood at about 963 thousands. It was 801 thousands in 1951.

The number of working cattle and buffaloes has increased from about 307 thousands in 1935 to 324 thousands in 1951. The number of working cattle appears to be governed by the number of ploughs and carts. The number of ploughs increased from 139 thousands in 1935 to 153 thousands in 1951 due apparently to progressive fractionalisation of holdings. The number of cart started rising since 1920 when the figure stood at about 31 thousands. The number was about 66 thousands in 1951. The average net cultivated area per plough worked out to 5.9 acres in 1951 as against 6.7 acres in 1920, and the average net cultivated area per pair of working cattle was 5.6 acres in 1951 as against 5.3 acres in 1935.

Breeding cows and she-buffaloes decreased between 1935 and 1944 from 307 thousands to 279 thousands. Their number has increased since 1944. They were 281 thousands in 1951. The cows and female buffaloes in milk per 1,000 of human population work out to 61 and 30 respectively. Owing to the poor milk yield the share of milk per head is only a few ounces per day.

The number of sheep has been decreasing since 1920. It stood at about 51 thousands in 1920, 45 thousands in 1925, 44 thousands in 1930, 40 thousands in 1935, 35 thousands in 1944 and 24 thousands in 1951.

The number of goats was 83 thousands in 1920. It increased to about 194 thousands in 1925 and then decreased to 161 thousands in 1930. It again rose to about 235 thousands in 1935 and since then the number has decreased to 129 thousands in 1951.

Horses and ponies decreased between 1920—30 from about 14 thousands to 12 thousands. The number was about 14 thousands in 1935 and 9 thousands in 1951. Donkeys also decreased from 976 in 1920 to 653 in 1951.

Distributed on 1,000 of human population, the figures of the main categories of live-stock in 1951 are as follows :

Cattle	Buffaloes	Sheep	Goats	Poultry	Others
558	199	23	122	34	16

10. To sum up, the population of the district is growing up at the biological natural rate since 1921. The magnitude of the absolute numerical increase in relation to the practically stationary acreage under cultivation is a great strain on the economy of the district.

11. The district has 1,652 villages and 8 towns. Out of 10·58 lakhs people, 9·81 lakhs were found in villages and 0·77 lakhs in towns, i.e., there were 927 persons per 1,000 population who lived in rural areas and only 73 of them lived in towns. The corresponding figures for the State as a whole were : rural 864, urban 136. Villages and towns

The rural population per inhabited village works out to 594. Quite a large number of the villages do not comprise of a single compact site. There are 4,578 hamlets in the district. The population per hamlet is 214. The medium sized village with population between 500—2,000 is the dominant type in the district. Of the rural population 59·8 per cent. live in such villages. Of the rural population 23·2 per cent. live in small villages of population under 500, 15·9 per cent. live in villages of population between 2,000 and 5,000 and 1·1 per cent. live in villages of population over 5,000.

Towns also vary greatly in number of inhabitants. 49·9 per cent. of people live in towns of population between 5,000 and 10,000 (*viz.*, Kheri, Muhamdi, Dhaurahra, Singahi and Palia), 32·4 per cent. in a town of population of 20,000 and over (*viz.* Lakhimpur), 13·7 per cent. in a town of population between 10,000 and 20,000 (*viz.*, Gola Gokarannath) and 4·0 per cent. in a town of population under 5,000 (*viz.*, Oel). Lakhimpur has recorded an increase of 18·0 per cent. since 1941 while the percentage increase in Gola Gokarannath has been 37·9 per cent. The other towns have not shown any significant increases. (*Vide* Tables A-III and A-IV)

12. Out of the total population of 1,053,343 persons (rural 981,081, urban 77,262) 913,830 persons (rural 891,980, urban 21,850) or 86·3 per cent. depend on agriculture for their means of livelihood and 144,513 persons (rural 89,101, urban 55,412) or 13·7 per cent. depend on non-agricultural sources. The following table gives the distribution of 100 persons of total, rural and urban population of the district : Occupations :
Livelihood
pattern

Description	Agricultural classes					Non-agricultural classes				
	Total	I	II	III	IV	Total	V	VI	VII	VIII
Total	86·3	76·9	5·3	2·7	1·4	13·7	4·2	2·6	0·4	6·5
Rural	90·9	81·4	5·4	2·8	1·3	9·1	2·9	1·3	0·2	4·7
Urban	28·3	21·4	3·4	1·7	1·8	71·7	20·3	18·2	2·8	30·4

This district is one of the more agricultural districts of the State. Here as many as 86·3 per cent. of people are engaged in agriculture as against 74·2 per cent. in the State.

Of the total population of the district, 656,997 (males 207,565, females 449,432) or 62·1 per cent. have been classified as non-earning dependants. The percentage of non-earning dependants in the agricultural population works out to 62·8 and that among the non-agricultural population to 57·6. It will be observed that in the main they consist of women. The male non-earning dependants are mostly children. Of the total population of the district, 48,817 persons (males 28,009, females 20,808) or 4·6 per cent. of the population are earning dependants. Among the agriculturists their proportion is 4·8 per cent. and among non-agriculturists they form 3·4 per cent. Agriculture is a family occupation and it provides work to the women and grown-up children in the family. The remaining 352,529 persons (males 336,513, females 16,016) or 33·3 per cent. are self-supporting persons. Their proportion among agriculturists is 32·4 per cent. and among non-agriculturists 39·0 per cent. Of the self-supporting persons 296,219 (males 285,496, females 10,723) belong to the agricultural classes and 56,310 (males 51,017, females 5,293) to the non-agricultural classes. On an average a self-supporting person maintains two non-earning dependants.

Of the 56,310 self-supporting persons of non-agricultural population, 1,277 persons (rural 1,079, urban 198) earn their livelihood from non-productive sources. Of the remaining 55,033 self-supporting persons (rural 37,716, urban 17,317), 1,308 (rural 690, urban 618) or 2·4 per cent. are employers, 15,864 (rural 8,247, urban 7,617) or 28·8 per cent. are employees and 37,861 (rural 28,779, urban 9,082) or 68·8 per cent. are independent workers.

The distribution of 10,000 self-supporting persons of non-agricultural occupations classified according to economic divisions is as follows :

Name of division	Self-supporting persons by divisions
All Industries and Services	10,000
0—Primary industries not elsewhere specified	486
1—Mining and quarrying	32
2—Processing and manufacture—food-stuffs, textiles, leather and products thereof	1,765
3—Processing and manufacture—metals, chemicals and products thereof	404
4—Processing and manufacture—not elsewhere specified	757
5—Construction and utilities	122
6—Commerce	1,554
7—Transport, storage and communications	283
8—Health, education and public administration	805
9—Services not elsewhere specified	3,792

Among the large scale industries the principal are sugar and confectionary. Among the cottage and small scale industries, the principal are *tat patti*, brass and copper wares, agricultural implements, iron castings, weights, balances and cane-crushers etc. and cane and reed furniture and basket making.

Variation in the livelihood pattern

13. In this district, the proportion of population depending on agriculture for their livelihood was 86.1 per cent. in 1951. The unfortunate fact is that the agricultural proportion had been increasing since 1901. The figure stood at 75.6 per cent. in 1901, 76.0 per cent. in 1911 and 84.9 per cent. in 1921. The actual number of persons who depend on agriculture has increased to 911,439 in 1951 from 775,734 in 1921, i.e., by 17.5 per cent. while the cultivated area has increased only by 0.5 per cent. This has resulted in progressive fragmentation and sub-division of holdings and pressure on impoverished soil. There appears to be a gradual decline in village arts and crafts. The cumulative result is a fall in the proportion of workers and a corresponding rise in the dependency. The proportion of workers in the total population in 1951 was 37.9 per cent. (agricultural 31.9 per cent., non-agricultural 6.0 per cent.) against 47.3 per cent. (agricultural 38.4 per cent., non-agricultural 8.9 per cent.) in 1921. The proportion of non-earning dependants has consequently increased from 52.7 per cent. (agricultural 46.5 per cent., non-agricultural 6.2 per cent.) in 1921 to 62.1 per cent. (agricultural 54.2 per cent., non-agricultural 7.9 per cent.) in 1951. All this is an index of the increasing unemployment and under-employment. It is only by a diversion of the population to cottage and other industries and by supplying subsidiary occupations to agriculturists that the present disequilibrium in the economy of the district can be redressed. (*Vide* Tables B-I, B-II and B-III)

Houses and households

14. There were 186,891 occupied houses in the district—173,039 in villages and 13,852 in towns. That gives an average of 5,670 persons per 1,000 houses or 5.7 persons per house in the rural areas and 5,578 persons per 1,000 houses or 5.6 persons per house in the urban areas.

There were 231,167 households in the district—213,495 in rural areas and 17,672 in urban areas. That gives an average of 4,585 persons per 1,000 households or 4.6 persons per household in

Census year	Persons per 1,000 households of	
	Rural population	Urban population
1921	4,671	7,453
1931	4,703	4,942
1941	4,827	5,163
1951	4,585	4,311

rural areas and 4,311 persons per 1,000 households or 4.3 persons per household in urban areas. The marginal table shows the development in the size of the household since 1921. The rural household has registered a decrease since 1941 and is smaller than the average State rural household (5.07). The urban household has also decreased since 1941.

Out of 4,585 persons in every 1,000 rural households, 2,471 are males and 2,114 are females. There is a male excess numbering 357 in every 1,000 rural households. Out of 4,311 persons in every 1,000 urban households, 2,370 are males and 1,941 are females. There again is a male excess of 429 in every 1,000 urban households. The migration of male labour from the rural areas to the towns will account for this difference.

Information regarding types of household and household relationship was also collected at this census with the help of a sample of about 4 per cent. According to this in every 1,000 sample households there are 4,465 persons (males 2,418, females 2,047) in the district. The corresponding figure for the total count is 4,564.

The table below shows the distribution by size of 1,000 sample households :

Description				Small with 3 members or less	Medium with 4—6 members	Large with 7—9 members	Very large with 10 members or more
Total	413	406	135	46
Rural	411	409	136	44
Urban	432	366	120	82

The small households are the dominant type both in villages as well as in the towns.

*The figure includes earning dependants according to their secondary means of livelihood while the figure 86.3 in paragraph 12, includes earning dependants according to their principal means of livelihood and hence the difference.

Family composition of 1,000 sample households is as follows :

						Number in 1,000 households	
A	{	Heads of households	{ Males (married) ..	630
						{ Males (widowers) ..	280
						{ Females ..	90
						{ Wives of heads of households ..	630
						<hr/>	1,630
B	{	Sons of heads of households	770
		Daughters of heads of households	598
						<hr/>	1,368
C	{	Male relations of heads of households (other than sons)	520	
		Female relations of heads of households (other than daughters)	670	
						<hr/>	1,190
D		Persons unrelated to the heads of the households				{ Males ..	218
						{ Females ..	59
						<hr/>	277
Grand Total						..	4,465

Sons outnumber the daughters of heads of households. The latter leave the homes of their parents after marriage. Female relatives (other than daughters) outnumber the male relatives (other than sons). Such females are generally those who become members of these households by marriage. (*Vide* Tables A-I and C-I)

15. In the district as a whole the sex-ratio was 850, i.e., there were 850 females to every 1,000 males. It was almost the same among the tehsils. The highest value was 851 in Muhamdi tehsil and the lowest value was 849 in Nighasan tehsil. The sex-ratio in Lakhimpur tehsil was 850. **Sex-ratio**

The sex-ratio is higher in rural areas than in the urban areas. For the district as a whole the sex-ratio in villages was 853 while that in towns it was 809.

The corresponding figure of sex-ratio in the district was 883 in 1921, 871 in 1931, 869 in 1941 and 850 in 1951.

16. The number in each age-group in the district is shown below as a percentage of the total number of all ages in the total, rural and urban population : **Age structure**

Age-group		Total population			Rural population		Urban population		
		Persons	Males	Females	Males	Females	Males	Females	
Infants and young children	0—4	.. 12.5	6.1	6.4	6.1	6.4	6.6	6.3	
Boys and girls	5—14	.. 22.6	12.5	10.1	12.4	10.1	13.6	10.3	
Young men and women	15—34	.. 34.1	19.0	15.1	19.0	15.1	19.4	14.7	
Middle-aged men and women	35—54	.. 22.7	13.0	9.7	13.0	9.7	12.9	9.4	
Elderly persons	55 and over	.. 8.1	4.0	4.1	4.1	4.1	3.7	3.1	

It will be seen that the population is progressive. 35.1 per cent. of the population is of age under 15 and 8.1 per cent. of it are elderly persons (55 and over). (*Vide* Table C-II)

17. Out of every 10,000 persons in the district, there are 5,467 males and 4,533 females.* Among them 2,585 males and 1,596 females are unmarried. If we reckon males and females together, the unmarried people are 41.8 per cent. of the total population. **Marital status**

Of the males 47.3 per cent. were unmarried, 46.1 per cent. were married, and 6.6 per cent. were widowed or divorced. Among the females 35.2 per cent. were unmarried, 52.2 per cent. were married and 12.6 per cent. were widowed or divorced.

*The corresponding figures of the total count are 5,405 males and 4,595 females.

Of the married males 0.9 per cent. were of ages below 15, 47.1 per cent. were of ages 15—34, 41.4 per cent. were of ages 35—54 and 10.6 per cent. were of ages 55 and over. Among females 4.8 per cent. were of ages below 15, 59.1 per cent. were of ages 15—34, 31.2 per cent. were of ages 35—54 and 4.9 per cent. were of ages 55 and over.

Marriage is universal. Among males and females aged 35 years and over 6.2 per cent. of the males and 0.2 per cent. of the females were found to be unmarried. Most of the females are married before they attain the age of 25. Child marriage is not very common. Only 1.2 per cent. of the males of ages 0—14 and 6.8 per cent. of females of ages 0—14 were returned as married. (*Vide* Table C-III)

Languages

18. Over 99.4 per cent. of the people of the district returned Hindi, Hindustani or Urdu as their mother-tongue. Among the other mother-tongues spoken, the main are Punjabi (0.28 per cent.) and Nepali (0.22 per cent.). Of 10.58 lakhs of people in the district only 2,414 or 0.2 per cent. were bilingual (in an Indian language). Those whose mother-tongue is other than Hindi, Hindustani or Urdu are generally the migrants who are able to speak any of these as subsidiary language. Persons returning Hindi, Hindustani or Urdu as secondary language were 2,112 or 87.5 per cent. of those who were bilingual in some Indian language. (*Vide* Table D-I)

Religion and special groups

19. Out of 10,000 population of the district, the number of people belonging to different religions is: Hindus 8,350, Muslims 1,621, Sikhs 21 and Christians 8. Out of 10,000 population in villages the numbers are: Hindus 8,504, Muslims 1,472, Sikhs 17 and Christians 7. Of the 10,000 people in towns the numbers are: Hindus 6,393, Muslims 3,520, Sikhs 66, Christians 18 and others 3. Muslims, Sikhs and Christians are generally concentrated in the urban areas of the district as is the case in the other parts of the State.

There were about 263 thousand people belonging to the scheduled castes in the district. Their number per 10,000 of population works out to 2,482. In villages they are 2,634 for every 10,000 and in the towns their number per 10,000 is only 559. In this district there were 27 Anglo-Indians. (*Vide* Table D-II and D-III)

Displaced persons

20. The number of displaced persons in the district at the census was 2,315 (males 1,302, females, 1,013), a large majority of whom were concentrated in urban areas. 73.0 per cent. of the displaced persons were from West Pakistan, 2.2 per cent. from East Pakistan, and 24.8 per cent. from districts which could not be traced. (*Vide* Table D-V)

Literacy

21. In 1951 the percentage of male literacy was 9.7 while that of female literacy was 1.7. In 1931 the literacy was 4.2 per cent. for males and 0.5* per cent for females. On January 1, there were 406 primary schools with an enrolment of 31,247. (*Vide* Table D-VII)

C—EXPLANATORY NOTE ON THE STATISTICS

1. The statistics in this volume have been presented in three parts :

I—District Census Tables

II—Village, Town, Pargana and Thana Statistics

III—Miscellaneous Statistics

Parts I and II contain census data. A brief account of the system of sorting of census slips and preparation of tables and abstract therefrom is given below :

Part III contains statistics throwing light on special aspects of population and its growth. These have been derived from miscellaneous sources. Table 1, "Vital Statistics", has been prepared from the published and unpublished records of the Director of Medical and Health Services, Table 2, "Agricultural Statistics", from the Annual Season and Crop Reports, Table 3, "Live-Stock, Agricultural Machinery and Implements", from the published figures of Live-Stock Census and Table 4, "List of Primary Schools", from information specially supplied by District Inspector of Schools.

Processing of census data

2. The census data presented here has been derived from the census slips by a process of sorting, compilation and tabulation. In previous censuses the slips were first sorted by religion and this division was maintained throughout so that all data was cross-tabulated by religion. This procedure has been abandoned at this census and substituted by a division based on economic characteristics of the population. The whole population has been divided into eight livelihood classes, four of which are of the agricultural category and four of non-agricultural category as follows :

Agricultural Classes—

I—Cultivators of land wholly or mainly owned ; and their dependants

II—Cultivators of land wholly or mainly unowned ; and their dependants

III—Cultivating labourers ; and their dependants

IV—Non-cultivating owners of land ; agricultural rent receivers ; and their dependants

*The number per mille (of the 10 per cent. sample population) of each sex aged 5 years and over who were returned as literates are as below :

Males		Females	
1951	1931	1951	1931
101	49	21	6

Non-agricultural Classes—

V—Production (other than cultivation)

VI—Commerce

VII—Transport

VIII—Other services and miscellaneous sources

Another special feature of the sorting of this census was the separation, from the very start, of slips of displaced persons and of a 10 per cent. random sample from the remainder. This has enabled the data of displaced persons to be presented separately, while the 10 per cent. sample has been utilized for the preparation of Age Tables.

The slips of this census have been copied by Households into a National Register of Citizens, which has been prepared village-wise for rural areas and mohalla-ward-wise for urban areas. Table C-I is based on a 4 per cent. sample extracted from this Register.

3. The slips were first sorted by villages for the preparation of the Primary Census Abstract. For the purpose of further sorting the State was divided into tracts consisting of (a) *rural tracts*, tracts comprising the rural population of each tehsil, (b) *urban city tracts*, comprising the population of areas which had been declared as cities, (c) *urban non-city tracts*, comprising the population of urban areas of a district excluding areas declared as cities. Each tract was treated as a unit for sorting of slips. All data were compiled first by tracts and then by districts. This volume presents the tract-wise data for one district (with the exception of A and E Tables, which have been presented tehsil-wise), while the district-wise data for the whole State is contained in the following State volumes :

Part I-B—Subsidiary Tables

Part II-A—General Population Tables

Part II-B—Economic Tables

Part II-C—Age and Social Tables

4. Detailed explanatory notes are appended to each State table in the printed volumes of State tables. They apply to the tables in this volume also and should be referred to when necessary. A few notes of some of the tables are reproduced below :

Table A-I—Column 5 relating to “hamlets” has been introduced for the first time. Any distinctive cluster or agglomeration of houses has been treated as a “hamlet”.

A clear distinction has been made in this census between a “House” and a “Household”. A house is any human dwelling having a separate main entrance while a household is any communal unit living in a census house. In previous censuses the figures under “Occupied Houses” used to be that of households, while the figures under columns 7—9 of the present tables refer to occupied census houses as distinct from households.

The Economic Tables—The Indian Census Economic Classification Scheme, 1951, together with the occupational division and sub-division adopted for this census are given in Part II-B of the Report.

Table B-I—Each of the eight livelihood classes mentioned above has been divided into three sub-classes, with reference to the economic status, as follows :

- (i) Self-supporting persons ;
- (ii) Non-earning dependants ; and
- (iii) Earning dependants

These were defined in the Instructions to Enumerators as follows :

“A ‘self-supporting person’ is one who is in receipt of an income and that income is sufficient at least for his own maintenance. To be ‘self-supporting’ a person need not be able to support his family. All that is necessary is that he should be earning sufficient for his personal needs. For purposes of this question the person enumerated is the unit and not the family or household. Any one who is not a ‘self-supporting’ person in this sense is a ‘dependant’. A ‘dependant’ may be either an ‘earning dependant’ or a ‘non-earning dependant’. The test is whether he secures a regular (and not casual) income, even though it may be small. Such income may be in cash or kind ; it may be continuous or seasonal employment. When the income which he secures is not sufficient to support him that person is an ‘earning dependant’. A person who does not earn any income either in cash or kind is a ‘non-earning dependant’. Where two or more members of a family household jointly cultivate land and secure an income therefrom, each of them should be regarded as earning part of the income. None of them is, therefore, a ‘non-earning dependant’. Each of them should be classed either a ‘self-supporting person’ or an ‘earning dependant’ according to the share of income attributable to each. The same applies to any other business-carried on jointly. The share of the income is what the head of household deems it to be. This does not mean that every one who works is necessarily a self-supporting person or an earning dependant. Thus, for instance, a house-wife who cooks for the family, brings up the children or manages the household is doing very valuable work. Nevertheless, her economic status is that of a non-earning dependant, if she does not also earn an income, and should be recorded as such.”

Economically active, Semi-active and Passive persons—All non-earning dependants are economically passive. They include persons performing house-work or other domestic or personal services for other members of the same family household. But they do not include "unpaid family workers" or persons who take part along with the members of the family household in carrying on cultivation or a home industry as a family enterprise.

All earning dependants are economically semi-active only. Though they contribute to the carrying on of economic activities, the magnitude of their individual contribution is deemed to be too small to justify their description as economically active. (Their contribution to economic activity is, however, taken into account in the tabulation of data based on secondary means of livelihood.)

All self-supporting persons are, ordinarily economically active with the exception of the following classes and groups :

(a) All self-supporting persons of Agricultural Class IV.

(b) The following groups of self-supporting persons who are included in Non-agricultural Class VIII and derive their principal means of livelihood from miscellaneous sources (otherwise than through economic activity) :

(i) Persons living principally on income from non-agricultural property ;

(ii) Persons living principally on pensions, remittances, scholarships and funds ;

(iii) Inmates of alms-houses and recipients of doles ;

(iv) Beggars and vagrants ; and

(v) All other persons living principally on income derived from non-productive activities.

Table B-II—For a self-supporting person who has more than one means of livelihood the *secondary means* of livelihood is the livelihood next in importance to his principal means of livelihood. For an earning dependant it is the source from which he secures his own income, where there are more than one subsidiary occupations only the one providing the largest income has been taken into account.

Table B-III—"Employers", "Employees" and "Independent Workers" have been defined as follows in the Instructions to Enumerators :

An "employer" is only that person who has necessarily to employ other person in order to carry on the business from which he secures his livelihood. Thus if a person employs a cook or any other person for domestic services, he should not be recorded as an "employer" merely for that reason.

An "employee" is a person who ordinarily works under some other person for a salary or a wage in cash or kind as the means of earning his livelihood. There may be persons who are employed as managers, superintendents, agents etc., and in that capacity control other workers. Such persons are also employees only and should not be regarded as 'employers'.

An "independent worker" means a person who is not employed by any one else and who also does not employ anybody else in order to earn his livelihood. (Sweepers, *dhobies*, *kahars*, etc., who work for several masters are independent workers. If, however, any of them accepts whole-time employment under the one master he becomes "employee". Daily wage-earners who work for different masters are likewise independent workers. But if they accept employment under one master, e.g., under a factory, they become "employees".)

Tables C-II, C-III, C-IV and C-V—The figures presented in these tables are based on single year age-return and have not been smoothed.

Tables D-V (i) and (ii)—For the purpose of these tables a "displaced person" has been defined as follows :

"A displaced person means any person who has entered India having left or being compelled to leave his home in Western Pakistan on or after the 1st March, 1947, or his home in Eastern Pakistan on or after the 15th October, 1946, on account of civil disturbances or on account of the setting up of the two Dominions of India and Pakistan."

PART I

DISTRICT CENSUS TABLES

A—GENERAL POPULATION TABLES
A-I—Area, Houses and Population

Serial number					Occupied houses				
	Tehsil				Area in square miles	Villages	Hamlets	Towns	Total
1	2	3	4	5	6	7	8	9	
District Total	2,967	1,652	4,578	8	186,891
1 Lakhimpur	1,053	673	1,837	3	74,236
2 Muhamdi	663	592	1,147	2	50,824
3 Nighasan	1,251	387	1,594	3	61,831

Serial number	Population									
	Persons			Males			Females			
	Tehsil	Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban
1	2	10	11	12	13	14	15	16	17	18
District Total	..	1,058,343	981,081	77,262	572,087	529,376	42,711	486,256	451,705	34,551
1 Lakhimpur	..	437,556	400,100	37,456	236,489	216,013	20,476	201,067	184,087	16,980
